## ROK:X SALT CHLORINATORS

Noria ROK:X Salt Chlorinators kill bacterial contaminants in pool water by the process of electrolysis. Salt water is passed through the electrolytic plates contained within the cell housing and manufactures chlorine gas. The end result is crystal clear, safe, sparkling water.

A Noria ROK:X produces a continuous level of sanitiser eliminating the traditional problems associated with manual dosing of chlorine. Accurate water balance is paramount to protect the pool surface and equipment and to maintain healthy water.

The control dial on the unit allows chlorine output to be adjusted to suit demand. Intelligent design allow a Noria ROK:X to clean itself by reversing the polarity of its plates. This process removes build up on the plates to ensure optimum performance and cell life. For hard water areas a Hard/Soft setting is available.

ROK:X Salt Chlorinators are part of a range of intensively researched, high quality, connected products that work in harmony to ensure the pool is easy to maintain and ready for use at any time.

## SPECIFICATIONS

Model	Per hour			Over 8 hours	
	Chlorine Output	Equivalent (65%)	Equivalent (12.5%)	Chlorine Output	Equivalent (12.5%)
ROK:X20	20g/hr	30g/hr	120ml	160g	1.33 Litres
ROK:X30	30g/hr	46g/hr	200ml	240g	2.00 Litres
ROK:X40	40g/hr	61g/hr	280ml	320g	2.66 Litres

## RECOMMENDED SIZING

Always try to oversize by 20-30%. All measurements are based on 8/hr day and balanced chemistry

## WARRANTY

The ROK:X Salt Chlorinator by Noria is covered by a 5 year pro-rata warranty on the cell and a 2 year warranty on the power pack against defects in materials and workmanship. The instruction manual that accompanies each ROK:X provides more information.
